EDUCATION

Rochester Institute of Technology

B.S. in Computer Engineering

2001 - 2006

Community Service Head for the House of General Science

PROFILE

Senior Frontend Engineer with **15 years of experience** between **Front End**, **Full Stack**, and **Software Engineering**. Dedicated to **Sustainability**, **Waste reduction**, and **Ethics/Equity**. Perpetual **mentor** and mentee.

Turning designs into **effective, simple, functional**, and **accessible** web applications and user Interfaces with a mind for **scalability, reuse, testing**, and **performance**. Prioritizing the highest standards in code, communication, documentation, and **integrity**.

PROFESSIONAL EXPERIENCE

CLIMATEBASE FELLOW

May 2023 - July 2023

Climatebase Fellowship - Cohort 3

Remote

- Participating in the Climatebase Fellowship, a climate career accelerator for mission-driven professionals

FRONT END ENGINEER II

Jan 2019 - May 2022

Amazon Web Services - Service Catalog Console

Seattle, WA

- Assisted migration of the SC console from AngularJS 2.x to React, Redux, TypeScript, NPM, ESLint, Webpack, & Babel
 - Complete rewrite of the console from scratch—old console code was able to be 100% deprecated and deleted!
 - Upgraded JS unit test to Enzyme, jest, and React Testing Library
 - Managed a complex transition period with both apps active
- Led launch of the console in the 2nd US Government special region
 - Updated the region launch process, reducing the time to launch a new region by over 50%
 - Built the foundation for a future launch in China
 - Built project template; Recognized by senior leadership as a desirable example for the whole organization to follow
- Engineering and project lead for analytics research and integration
- Completed the complex migration of the core OS on 150+ web servers, including dev boxes, alpha, beta, and production
- Created extensive documentation of projects and team processes, such as code and CR guidelines, project templates, and guides
- Performed extensive and in-depth code reviews, earning the title of "team code gatekeeper"; especially during the early migration
- Co-founded the team's Cultural Lunch & Learn program, a regular meeting to discuss sensitive issues like equity, sustainability, or politics in a safe and inclusive environment
- Mentored several team members, who became high-impact devs

RECOMMENDATIONS

“Eric gives new meaning to one of Amazon's primary leadership principles: “insist [on] the highest standards”.”

JUSTIN, AWS

“Eric is one of the best people I've worked with at AWS, he is very diligent and sets a very good example for others to leave the campsite cleaner than before. His code and technical design are very thorough, and he gives great feedback and suggestions.”

VARUN, AWS

“Eric's passion for sustainability and equity was clearly inspiring not just for me but also for the team. Any team would be lucky to have Eric, and I couldn't recommend him more for any business looking for new talent.”

TAUSEEF, AWS

PROFESSIONAL EXPERIENCE (CONT.)

WEB DEVELOPMENT ENGINEER II (DESIGN TECH)

Sep 2017 - Jan 2019

Amazon.com - Search Design Technology

Seattle, WA

- Extensively collaborated with designers, engineers, and managers for both the Information architecture and the feature set
- As a solo dev, delivered an entire custom prototype website of 20+ pages of markdown content across several distinct designs within 45 days and it presented to senior org leadership (phase 1)
- For phase 2, built all (internal) customer-facing UI and the macro system for use in the CMS editor
- For phase 3, provided supporting functions similar to PM, engineer, designer, TPM, and content architect. Provided "daytime on-call" support across the entire stack

WEB DEVELOPMENT ENGINEER II (JAVA SDE)

Oct 2015 - Sep 2017

Amazon.com - Retail Search Customer Experience

Seattle, WA

- Altered display of B2B items based on customer's and item's properties
 - Maintained a complex logic tree of display possibilities
 - Improved 100,000+ items to provide contextually relevant information and call-to-action
- Led development for Comparison View, which surfaces the top product specs for items directly in the search results
 - Wrote code encompassing the full stack, including datapath (custom database), Java, JSP, JavaScript, and HTML/CSS
 - Collaborated extensively with the catalog, recommendations, and hardlines teams, along with product and QA
 - Increased OPS by a confidential, statistically significant amount

FRONT END DEV; CLIENT ENGINEER; CUT UP ARTIST

May 2009 - Sep 2014

Synacor - Various Teams

Buffalo, NY

- Created and maintained complex JavaScript applications
 - Wrote close to 75% of the JS and 95% of the HTML/CSS for Primetime 2.0, a ground-up re-write of the video channel
 - Replaced two 4000-line JS files with a proper framework of small files
- Worked with client managers to handle client requests and product deployments
- Worked on internal projects to improve portal deployment speed and accuracy
 - Reduced the average time-to-launch for small ISPs from 2 weeks to 2 hours
- Converted designs into HTML & CSS, pixel perfect in IE6-9, Safari, FireFox, and Chrome

APPLICATION DEVELOPER ASSOCIATE PROFESSIONAL

June 2006 - Oct 2008

BAE Systems - Information Technology

Binghamton, NY

- Created custom data-driven websites for internal clients using Oracle APEX, JavaScript, SQL, and PL/SQL
